

PROFESSIONAL DIPLOMA PROGRAM IN CHILD & ADOLESCENT HEALTH

ONLINE

Gain an introduction to managing common health conditions seen in children and adolescents, from mental health and child safety issues through to dermatological conditions and long-term health problems. Be better equipped to provide early identification and intervention of developmental, behavioural, and physical health issues in children to improve patient outcomes and reduce risk of more serious problems. Provide holistic family health care and learn strategies to promote healthy development and prevent common medical problems arising in youths. Plus, know how to coordinate care with paediatric specialists and learn when referral is appropriate for complex issues.
