

# Personalised 1:1 Aesthetics Mentoring with Kelly Beasy

If you have completed Aesthetic Medicine training with HealthCert Education and want to strengthen your skills in injectables, personalised hands-on mentoring with Nurse Practitioner Kelly Beasy is the ideal next step to refine your technique, boost your confidence, and reinforce safe practice.

## What you will gain

- ✓ Receive personalised one-on-one mentoring tailored to your experience level and learning pace – beginner friendly and fully customised.
- ✓ Set your own focus areas, including consultation skills, facial assessment, anatomy, injection techniques, or managing adverse events.
- ✓ Gain full hands-on experience with real models in a safe, supportive, and practical setting.
- ✓ Strengthen your confidence and clinical skills through real-world applications.
- ✓ Learn from an experienced and highly regarded educator, actively engaged with leading aesthetic brands and training programs.
- ✓ Receive a Certificate of Mentoring upon successful completion.

## How it works

- Choose your training location, either at Kelly's Nundah clinic in Brisbane or at your own practice (Australia-wide, travel fees apply).
- Set your own training focus, including toxins, fillers, skin boosters, or biostimulators.
- Use your own models for real treatment outcomes, or request assistance with model recruitment (available in Brisbane, Sydney, Melbourne, and Perth). Models are selected based on the treatment indications relevant to your session, and pay a product recovery fee (e.g. \$250 for upper face toxins, \$250 per 1 ml filler)
- Bring your own injectable products, or opt for Kelly to supply training stock (costs discussed in advance).

## Pricing

- From \$999 + GST for a half-day session at the Nundah clinic.
- From \$1,250 + GST for half-day training at your clinic.
- Travel fees apply for locations over 50km from Brisbane.
- Product fees to be agreed upon in advance, or bring your own training stock.
- Additional fees for consumables may apply, such as sterile injecting packs, chlorhexidine, or emergency kits for adverse events.

**Whether you are refining advanced techniques or just starting out, Kelly's training is practical, safety-focused, and designed to help you thrive in clinical practice.**
