

Build real skills for everyday nursing

CPD-endorsed,
university-assured
courses for nurses,
from \$195.

PROFESSIONAL DIPLOMA PROGRAM IN MELANOGRAPHY

ENDORSED BY

Learn to screen and identify skin lesions with confidence through our comprehensive three-stage pathway in Melanography, built for nurses seeking to support early skin cancer detection in general practice.

PROFESSIONAL CERTIFICATE OF MELANOGRAPHY

Learn the foundations of primary care melanography, from common types of benign and malignant skin lesions through to best practice approaches for reaching a confident diagnosis.

- Basal cell carcinoma
- Squamous cell carcinoma
- Melanoma
- Pigmented skin lesions
- Non-pigmented skin lesions
- Chaos & Clues dermoscopy
- Pink lesions
- Skin imaging techniques
- Non-melanocytic lesions

ADVANCED CERTIFICATE OF MELANOGRAPHY

Become confident in conducting a thorough skin assessment with dermoscopy, and learn how to identify a broad range of suspicious skin lesions across all patient age groups and skin types.

- Non-melanoma skin cancer
- Melanocytic naevi
- Melanoma
- BCC & keratinocyte skin cancer
- Difficult benign lesions
- Screening children
- Screening young adults
- Screening older patients
- Lesions in different skin types

PROFESSIONAL DIPLOMA OF MELANOGRAPHY

Round out your melanography skills with a comprehensive understanding of dermatopathology and the knowledge to identify suspicious lesions, including difficult, rare and aggressive skin cancers.

- Difficult melanomas
- Rare skin tumours
- Merkel cell carcinoma
- Rare/aggressive skin cancers
- Dermatopathology correlation
- Histopathology
- Specimen processing
- Management of special cases
- Immuno-suppressed patients

MICRO-COURSES IN SKIN CANCER

Complete each short Micro-Course
in under 10 hours!

The ideal starting point to build core knowledge in skin cancer. Learn vital diagnostic skills and basic management techniques.

FOUNDATIONS OF SKIN CANCER MEDICINE

Topics covered in this course:

- Foundations of skin cancer medicine
- BEST protocol (**BE**nign or **S**uspicious **T**est)
- The importance of skin checks
- How to identify patient risk
- How to perform a skin examination
- Punch and shave biopsy techniques
- Patient cases

SKIN IMAGING TECHNIQUES

Topics covered in this course:

- Digital dermatoscopy
- Total body photography
- Reflectance Confocal Microscopy
- Optical coherence tomography
- High frequency ultrasound
- Electric impedance spectroscopy
- Multispectral analysis
- Raman spectroscopy

PIGMENTED SKIN LESIONS

Topics covered in this course:

- Benign lesions (freckles, solar lentigo, seborrhoeic keratosis, haemangioma, dermatofibroma, blue naevi)
- Dermoscopy of pigmented lesions
- Three-Point Checklist
- Dysplastic naevi and melanoma
- Risk factors for melanoma
- Detecting benign and suspicious lesions

NON-PIGMENTED SKIN LESIONS

Topics covered in this course:

- Dermoscopy of non-pigmented lesions
- Biopsy approaches
- Treatment options inc field therapies
- Solar keratosis
- Bowen's disease
- Keratocanthoma
- Basal cell carcinoma
- Squamous cell carcinoma

MICRO-COURSES IN GERIATRIC CARE

Address the complex medical needs of geriatric patients, manage the health issues of an ageing population, and help provide early-stage identification of chronic health problems in older patients.

FALLS IN THE ELDERLY

Topics covered in this course:

- Risk screening tools
- Fall prevention strategies
- Patient examination inc home assessment
- Fall reduction programs

ELDER ABUSE

Topics covered in this course:

- Skin ageing and healing
- Causal factors for injuries
- Risk factors, signs and symptoms of elder abuse
- How to assess older patients
- The nurse's role
- Accessing support services

DEPRESSION IN THE ELDERLY

Topics covered in this course:

- Distress and suicide risk
- Causes
- Risk factors
- Effects and signs
- Diagnosis, screening, and assessment tools
- Treatment, inc education, lifestyle, medication, psychological considerations
- GP Mental Health Care Plans

MICRO-COURSES IN CHRONIC DISEASE

Gain an understanding of chronic conditions and illnesses commonly encountered in primary care to improve patient outcomes.

DIABETES MELLITUS

Topics covered in this course:

- Screening and pathology testing
- How to explain diabetes diagnosis and management to patients
- Initiating all areas of lifetime diabetes care
- Management strategies for glycaemic and weight control, diet and exercise, lifestyle choices, renal function, eye and foot health, blood pressure, lipids, and comorbidities
- Medical management of glycaemia

LIFESTYLE CHOICES IN MEN

Topics covered in this course:

- Health impacts of smoking and alcohol
- Impact of obesity and sedentary lifestyle
- Preventing poor lifestyle choices in men
- Comorbidities
- Encouraging positive lifestyle choices

ASTHMA & RESPIRATORY CONDITIONS IN CHILDREN

Topics covered in this course:

- Identification, triggers, risk factors, diagnosis
- Investigations, medications, and review
- Hospital admission
- Asthma
- Croup and bronchiolitis conditions
- Community-acquired pneumonia

OBESITY IN WOMEN

Topics covered in this course:

- Sustained behavioural change
- Lifestyle changes and counselling
- Patient education, lifestyle modifications
- Diet and exercise
- Medication as an adjunct to diet
- Weight loss surgery
- Nurse's role in education and advocacy

CPD-endorsed:

All courses are endorsed by a membership association or society.

Suitable for all nurses

including Enrolled Nurses, Registered Nurses, and Nurse Practitioners.

Study mode:

All courses are delivered 100% online. Start anytime and study at your own pace.
